The Egyptians perhaps derived their knowledge from the same source, but there is no proof that they were great observers, and the accurate orientation, proportions, and angles of the Great Pyramid and its inner passages may perhaps indicate a Chaldean Architect”

Francis Turner Palgrave (1824-1897)

“All of Nature – mountains, rivers, trees, crystals, metals, all living beings, even human beings – is nothing other than numbers incarnated. If you study this question in depth, you will find that nothing exists apart from numbers. Everything is number; Nature and the whole Universe are built upon numbers, which form an indestructible, geometric framework similar to the skeleton. So mathematics is abstract only at the level of principles; in the created world it takes on flesh and bone. For the moment, mathematicians work without knowing how the results of their calculations correspond to reality. One day, they will discover that all the physical, psychic and cosmic processes are there, all explained by numbers and their different combinations.”

PREFACE

In Philosophy, empiricism is a theory of knowledge that asserts that knowledge arises from evidence gathered via sense experience. Empiricism is one of several competing views that predominate in the study of human knowledge, known as epistemology. Empiricism emphasizes the role of experience and evidence, especially sensory perception, in the formation of ideas, over the notion of innate ideas or tradition.

In a related sense, empiricism in the philosophy of science emphasizes those aspects of scientific knowledge that are closely related to evidence, especially as discovered in experiments. It is a fundamental part of the scientific method that all hypotheses and theories must be tested against **observations of the natural world**, rather than resting solely on *a priori* reasoning, intuition, or revelation. Hence, science is considered to be methodologically empirical in nature. (Wikipedia, 2010)

The content of this treatise is based, in addition to my own thinking, on the Kabbalah methodology of numerology according to the ancient Chaldeans, a Semitic people of Arabic origin living in southern Babylonia in the early part of the 1st Millennium B.C., using the letter-number conversion table below.

1	2	3	4	5	6	7	8
A	B	C	D	E	U	O	F
I	K	G	M	H	V	Z	P
J	R	L	T	N	W		
Q		S		X			
Y							

For a good understanding of the content of the treatise, the methodology for creating ‘cosmic numbers’ out of a name and birth date is exemplified as follows :

	PYTHAGORAS OF SAMOS		
	8145137213	78	31473
Summed by component	35	15	18
	8	6	9

= for the single cosmic number: $8+6+9 = 23 = '5'$

And for the compound cosmic number: $35+6+9 = 50 =$ by convention -in order to accommodate also the longer names- a ‘32’

Thus Pythagoras of Samos is by his name a ‘5/32’, called ‘Communication’.

Pythagoras’ birth date is given as ‘around’ 569 B.C. Let’s make it happen on 4 March of that year to establish his cosmic birth number:

$$04-03-569 = \text{summed up } 27$$

This provides the great mathematician and first philosopher in history with a cosmic birth number ‘9/27’, called ‘The Sceptre’, which he clearly was!

The combination of name and birth numbers ‘5/32’ and ‘9/27’ make Pythagoras a ‘5/41’ which by numerology convention, applying the so-called 9-rule, is once more a ‘5/32’. Humankind will never know what Pythagoras’ true ‘cosmic nature’ was, apart from the fact that ‘Pythagoras’ and ‘cosmic nature’ are each other’s numerological equivalent, as, true to his character emphasizing secrecy, his birth date is unknown!

For what follows in this manuscript, I owe a great deal to the late Linda Goodman whose book “Sun Signs” ‘The Secret Codes of the Cosmos’ came to me in a most mysterious way on 6 March 1989.

ONE

COMMON WISDOM

as all life is One, the World should come together as One

In addition to the foregoing, the following key pronouncements by some of our more notable ancestors are being provided upfront of this discussion, being an attempt to put across some basic elements for the development of a different way of thinking with consequent implications for action at various levels of human endeavour.

They seek so many, then they see that this
Is crumbled out again to its atomies

ALBERT EINSTEIN

‘IF HUMANKIND WANTS TO SURVIVE, IT WILL HAVE TO ADOPT
A RADICALLY DIFFERENT WAY OF THINKING’

On the basis of the imagined worlds of experience behind these expressions, which are generally accepted as ‘wisdom of the past’, although I maintain that both ‘the past’ as well as ‘the future’ are always with us in the present, this short treatise sets out in summary some cosmically as well as humanly induced experiences and insights gathered over the past twenty-one years. The hypothesis is that these may warrant some further intensified thought and consequent action at various levels of human organization and cultural and socio-economic endeavour, particularly at this juncture now that the ‘Family of Man’ has considerable trouble seeing itself as being on the right track and live in peace and harmony with each other -regardless of race, religion, socio-economic standard or political orientation- and Nature on this beautiful ‘god-given’ Planet Earth.

TWO

EVERYTHING IS NUMBER

two things are never the same and nothing is ever complete

Pythagoras (569-475 B.C.) who, in search of a more humanly tolerant philosophical environment, emigrated from Greece to Metapontum and Crotona in southern Italy in **532 B.C.**, is generally accepted as the first philosopher and mathematician of significance in this world. His 2nd and 3rd law's have indeed been written in stone over the ages and are unfailingly used in calculating and understanding the workings of 'things geometrical' with far-reaching implications for 'things social, cultural, economic, theological, scientific and political'.

However, for the **1st Law of Pythagoras**, proclaiming that "**Everything is Number**", implying that at its deepest level reality is mathematical in nature, mankind has never had much practical use. Yet, through the ages leading philosophers and scientists like Plato, Descartes, Leibniz, Spinoza, Copernicus, Galileo, Newton and Kepler, just to name a few, have all directly or indirectly addressed the issue of there being something truly determinant outside of what mankind has come up with in terms of philosophy, science and theology to explain the workings of the Universe, and our world as integral part of it.

And this is what the **1st Law of Pythagoras** describes in such eloquent simplicity. Plato, himself by his name a 5/23 like the word Nature, in his '*Cratylus*', also a 5/23, like also his '*Timaios*' in which he discusses the geometrical nature of Nature, considered the question whether names are significant by nature or by convention. He wondered in some depth whether there is some special appropriateness of the sounds of names to the objects called by them or whether it merely reflects the "usage of the community". Thus Plato shows that language is an instrument of thought; that the test of its rightness is not mere social usage. Unbeknownst to himself, Plato lifted here more than a tip of the 'cosmic veil' but in the some 2400 years after him this was not further elaborated to any point of shining the full light on the matter and defining a possible beneficial course of action for humanity as a consequence.

Pythagoras' explanation of the Cosmos was based on the use of the decad, i.e. the numbers **1, 2, 3, 4, 5, 6, 7, 8, 9, 10** as well as the Tetrad **1, 2, 3, 4**. For the latter, he assigned the names '**Creator**' to the number **1**; '**Female**' to the number **2**; '**Male**' to the number **3** and '**Justice**' to the number **4**, although, since there is at this stage preciously little objective -and certainly not infinite- justice around in this world, I would prefer, at least for the time being, the name '**Fate**' for the same number **4**.

An analysis from both a mathematical as well as philosophical point of view shows, with due respect to and in full recognition of the great Man Pythagoras and his Brotherhood and while recognizing the importance of the 'Tetrad 4-3-2-1' in relation to the evolution of life, that for the purposes of this treatise this approach can be further simplified by replacing the decad and tetrad by the single use of the decad, i.e. **0 – 9, or rather 1 through 9 -0**, as the basis of the existence of and occurrences in the Universe. Of these ten numbers particularly the string **1, 2, 3, 4, 5, 6** is highly relevant.

For the number **5**, it is proposed to use the name '**Reason**', in view of its relationship to rationalism and communication, and for the **6** the name '**Perfection**', by which Pythagoras describes this inverse **9**. According to numerological theory, the number **6** also relates to wisdom, knowledge and harmony, quantities in increasingly short supply on this planet!

For the number **7** it is proposed to use the dual Kabbalah name '**Spirituality**' as well as '**Death**', for reasons to be explained later on. For the number **8** it is proposed to use the Kabbalah name '**Destiny**' and for the ultimate number **9**, the inverse **6**, the name '**Force**'. Finally, last but definitely not least, it is proposed for both obvious and not so obvious reasons to use the name '**One**' for the number **0**.

The rationale for this diversion, if not simply a further elaboration bearing in mind Plato's words, from the Pythagorean practice stems largely from the fact that the sumtotal of **1, 2, 3, 4, 5 and 6** is **21**, which the Ancient Chaldeans, by their well established Kabbalah numerology, characterized as '**The Universe**'. Of the ten numbers, **0-9**, the Kabbalah defines the numbers **1, 3, 6 and 9** as the strong numbers in the positive sense of forceful. The sum of this new tetrad is **19**, called '**The Prince of Heaven**', about which in more

detail later. Adding the separate digits of this number, one obtains **10**, which two digits are the basis of the binary system of number, without which our world would be a very different place! If we add the two digits of this number we obtain **ONE** and this is very much the subject of this treatise.

The purpose of this discussion early on in the 3rd Millennium, accelerated and deepened further by recent and ongoing dramatic global events, is to introduce in all simplicity a number of elements on the basis of which Albert Einstein's urged radically different way of thinking requirement could be realized and implemented. Just as practically as the 2nd and 3rd Laws of Pythagoras, by adopting also his 1st Law globally across the board and implementing its practical implications at all levels of human activity.

To summarize it in an allegorical statement, which has its pros and cons, it seems increasingly that **Science** -and I insist that we should add **Technology**- , under the direction of and blessed, read manipulated, by politics and theology, led us out of the 'Garden of Eden' and up another rather murky and narrow 'garden path', which, for all it shows, only seems to lead to unbalance, misery and possibly oblivion for humankind as a whole.

During the last century as well as at the present time, we were all able to witness serious attempts in this direction, be it in a military, environmental, economic or socio-cultural context. Let it be said with some emphasis that this does not take anything away of the many positive achievements of science and technology, most of which deserve to exist in their own right and have elements of awe and wonder in them that we all need, live our lives by and profit from at the individual human and society level. But when, for the sake of keeping it small and comprehensible, I read in my newspaper that 'Science' is about to design and build a 'better mouse', that little grey living creature that we all either love or fear and not the one that drives our computers, with the objective of having mice doing some menial labour for us humans, I am asking myself: 'What's wrong with our mice, or rather with us?!' I'd rather see that science would put its dedication and focussed efforts in designing and building a 'better world' but that is probably beyond science, and seemingly not in the interests of its paymasters!!! Maybe we should expand the now somewhat timeworn expression that 'Religion is Opium for the People', which is still very true, with 'Science and its mate Technology' seeming to be slow poison for the People'!

The searching question to ask is "**Where has our Nature gone?!**" and the global issue is to urgently look for and possibly institute a mechanism to allow us to return to our true nature, before truly irreparable damage is done to life on this planet in its socio-cultural-political, economic and environmental meaning. For the driving force behind this discussion I propose to use the 'KISS Principle', the word KISS numerologically written as 2133, a 9 and in addition to its physical meaning also known as an acronym standing for: 'Keep It Short and Simple'. This approach is fully compliant with one of the basic notions in the domain of logic, i.e. 'Ockham's Razor', postulated in the 13th century, and 'saying' "why use many if few will do?"

THREE

SPINOZA AND THE COSMOS

many 'human things' things come in three's

The renowned Dutch Portuguese philosopher Baruch de Spinoza (1632-1677) was ex-communicated in 1656 by the powerful Jewish Sephardim community in Amsterdam at the tender age of 24, on the basis of an extremely forceful, read fearful, statement by which the ex-communication was made public. As we know, Spinoza considerably deepened the rationalist philosophies put forward by René Descartes, who lived in The Netherlands for twenty years after he was 24 years old and in Sweden until his death at age 54. It is worth noting that Descartes, similarly to Pythagoras Greece, left his native France in search for a more tolerant philosophical environment. This he found in Amsterdam, Leiden and Utrecht, like Spinoza in another way by his ancestors having been expelled from Spain and Portugal in the late 15th century.

I will now demonstrate some proof of the fact that indeed nothing happens by chance and that Pythagoras' 1st Law has a direct and significant bearing on all that is happening under the Sun. This on the basis of some of Spinoza's highly authoritative core philosophical pronouncements, gathered from his 'Theological-Political Treatise' of 1669 and his 'Ethica' of 1677.

According to the Kabbalah numerology, the name SPINOZA is a 5/32, the Mercury vibration, representing 'Reason' and 'Communication'.

Spinoza's core parameters for the Universe are: 'SUBSTANCE', a 5/32; 'ATTRIBUTES', a 5/32 and 'MODES', a 5/23. The number 32 was bestowed with the name 'Communication' and the 23 with the powerful name 'The Royal Star of the Lion'.

The combination of these three "quantities" make, following the Kabbalah method of numerology, a 6/33, being the same as Spinoza's full name BARUCH DE SPINOZA. Furthermore, Spinoza's core statements: 'NATURING NATURE' and 'NATURED NATURE' are both 5/32's and so are his favoured expressions 'LOVE OF GOD' and 'LOVE OF NATURE'. In the eye of many, including his own Hebrew Community, which expelled him at age 24, the Dutch Calvinist Church as well as the State made him an outright atheist and was treated as such, resulting in an all-out suppression of his truly outstanding work in which indeed the 'Love of God and Nature' shines through on every page.

The word NATURE itself like 'Inner Sun' and also the combination GRAVITY-ELECTROMAGNETISM is a 5/23 like MODES and the word 'GOD' as well as 'HIS NATURE' is a 5/14, like the words 'SUN' 'ALL LIGHT' 'QUANTIZATION OF LIGHT ENERGY' 'ELECTROMAGNETIC FIELD THEORY OF LIGHT' 'IMAGE' 'THE' 'THAT' 'TEN' 'ELECTROMAGNETISM' 'TIME' 'MIND' 'BRAINS' 'ALL THOUGHT' 'EYES' 'IDEAS' 'TEAM' 'DAY ONE' 'BIRTH' 'BODY' 'WAR AND PEACE' 'FDR' 'JUST' 'SAINT' 'MYTH' 'GALAXY' 'ALL THERE IS' '.COM' '.NET' and the statements 'IT IS TIME' 'NONDETERMINISTIC' 'CYCLIC' 'TIDE' 'PHI' 'QUASAR' 'QUBIT' 'BIG BANG THEORY' 'BIG BANG MACHINE' 'ALL IS ENERGY' 'MASS-ENERGY' and Albert Einstein's immortal formula 'E=MC²', 'IGF-II' 'H2O' 'ROMA' 'TIBER' 'S.P.Q.R.' 'VIA APPIA ANTICA' and, funny and good enough, 'LUCK', 'JUNK' 'PHILOSOPHY OF NATURE' 'META' 'MAYAN CULTURE' 'COSMOTHEOLOGY' 'ALL BEING' 'A SUPREME BEING' 'A STEADFAST BEING' 'TELECOMMUNICATION' 'CHAKRA' 'MULTIPLICATION BY TIME' 'DEOXYRIBOSE NUCLEIC ACID' 'THE TRUTH IS IN THE HANDS OF NATURE ONLY' and 'THE TRUTH IS IN THE HANDS OF GOD ONLY' and 'IN GOD WE TRUST' 'SMILE AT LIFE AND LIFE WILL SMILE AT YOU' 'PHILOSOPHY OF MIND' 'PERFECTIONING THE WHEEL' and 'IN NATURE WE TRUST' 'A TRANSCENDENTAL EVOLUTION' and..... 'IN THE BEGINNING', 'A MATTER OF TIME' 'EVERYTHING HAS ITS TIME' 'A MOMENT IN TIME' 'A MATTER OF PERSPECTIVE' 'BIG TURN' 'IN REALITY' 'I.O.U.' 'SAY YES' 'BACK TO BASICS' 'MAKE A DIFFERENCE' and....'MATHEMATICS IS NOT AN OPINION' and 'A SUN AND A NAME' and.....'A THEORY OF EVERYTHING' all Mercury vibrations, which clearly underpins the connection between God and Nature.

As to the obvious question why all of this comes out of the woodwork right now, as you probably know, all of us have recently left the 'Age of Pisces' and on 23 January 1999 we have formally entered the much sung-about astronomical 'Age of Aquarius'. And who needs more evidence to be convinced that everything is part of everything else and seemingly according to a very simple basic mathematical and natural principle?! And there is probably no better example of a name with the 5/32 "Communication" vibration than the man who connected -and maybe, indeed, 'connecting' is a better word than 'discovering'- the old and the new Worlds, CRISTOFORO COLOMBO! As a truly 'commanding' example of a 5/23 vibration the name of PLATO is mentioned with the greatest respect. Yet another key 5/23 is the, so hard to come by, word JUSTICE!

Another most convincing example of these two vibrations is the Great Thinker of the late 16th-early 17th century FRANCIS BACON (1561-1626) who connected the old and new worlds in Philosophy and Science -without being a scientist!- and was a 5/23 by the name FRANCIS and a 5/32 by FRANCIS BACON.

In his '**De Interpretatione Naturae**' he makes this reflection about his own person:

"Having a mind nimble and versatile enough to catch the resemblance of things.....and at the same time steady enough to fix and distinguish their subtler difference; as being gifted by Nature with desire to seek, patience to doubt, fondness to mediate, slowness to assert, readiness to reconsider, carefulness to dispose and set in order, and as being a man that neither affects what is new nor admires what is old, and hates every kind of imposture, (so) I thought that my mind had a kind of familiarity and relationship with Truth."

And my 'calculations' on the name Francis Bacon fully confirm this!!!

Paolo Zellini, in his authoritative book '**Numero e Logos**', published in 2010, quotes the Greek physician and philosopher Sextus Empiricus (ca.160 – ca.210 AD) as follows: **"The Principle of the structure of the Universe is Number; reason therefore that also Reason can call itself Number, being without doubt part and parcel of the power of the latter."**

And it seems that this over 1900 years old key statement holds true, taking into account the above listed relationships in which the 'defining words' **NATURE and REASON** have the same 5/23 vibration!

FOUR

CHANCE IS NOT!

fate and destiny, the numbers 4 and 8, bound inseparably together

Following this general introduction to the rather undeniable demonstration of the functioning of the 1st Law of Pythagoras, an introduction to a number of everyday life philosophical, scientific, religious and political realities and demonstration of their interconnections on a numerological basis can be useful in order to drive the points made above further home.

The number 21 has been assigned the name 'The Crown of the Magi', also called 'The Universe', by the Ancient Chaldeans and also is the sumtotal of the sextad 1-6. The following list of words and expressions which I have come across as having the '21' as cosmic vibration is in my opinion rather telling about the interrelationships between words in English. Some linguistic authorities say that English is indeed the universal language and should be spoken by every human being, at least as a second language and is here proposed as a '*lingua franca*' for all humanity:

'LOVE' 'ENERGY' '*DIES SOLIS*' 'THE GREAT SPIRIT' 'I AM WHO I AM' 'THE SUBTLE ENERGIES' 'THE SILENT KNOWLEDGE' 'INNER SENSE' 'SIXTH SENSE' 'IN THE BEGINNING WAS THE WORD' 'IMAGE OF CREATION' 'SOLAR IMAGE' 'RHYTHM' 'SPIRALS' 'THE DIVINE LOVE' 'A PARTICLE OF GOD' 'MIRROR NEURON' 'KISS FROM HEAVEN' 'SPIRIT AND SOUL' 'THE SPIRIT REALM' 'SIXTH SENSE' 'TIME IS ENERGY' 'TIME IS DIMENSIONAL' 'LAW OF TIME' 'TIME-SPACE CONTINUUM' 'CIRCULAR' 'TIME DOES TELL' 'TIME REVISITS' 'ONLY TIME' 'AT THE RIGHT TIME' 'TAKING TIME' 'RIGHT AND WRONG' 'HUMAN' 'ECCE HOMO' 'I HAVE A NATURAL DREAM' 'GREAT IDEAS' 'DEUS EX MACHINA' 'ALTER EGO' 'AIN SOPH AUR' 'THE BEING' 'THE IDENTITY' 'STEED' 'THE HUMAN WORLD' 'ONE WORLD' 'THE REAL WORLD' 'FIELD' 'GENES' 'MEMES' 'THE FEMININE' 'EARTHLY' 'ORDER-CHAOS' 'THE CHAOS THEORY' 'OUR NAME' 'LINGUA FRANCA' 'THE ENGLISH' 'THE HUMAN WILL' 'SYNAPS' 'TO MY MIND' 'LOGICAL' 'TRIAL AND ERROR' 'THE BRAVE' 'THE DESTINY VIBRATION' 'STELLA MARIS' 'CLIMATE' 'INNER CLIMATE', a double '21' 'VALUE' 'OBLIGE' 'GLOBAL CULTURE' 'THE INITIATES' 'INITIATIC' 'THINGS' 'STRINGS' 'WAVES' 'ETHER' 'MATERIAL' 'QUARTZ' 'THE SPACETIME' '04-08-3114 B.C.' As key representatives of this positive and gifted vibration I only wish to name one man in history who understood what geometry is all about, the name '**BERNINI**' and furthermore Descartes' famous expression

'I THINK, HENCE I AM'.

Two key examples of a 'straight 3' are the important statements 'I DO' as well as 'A Culture'.

By sharp contrast, just one up, the '22' was characterized by the Ancient Chaldeans as 'Submission and Caution' and described as 'A good person or entity, blinded by the folly of others, with a knapsack on his, her or its back, full of errors' and here are some telling 22's:

'WORLD' 'ALL OF US' 'KNOW THYSELF' 'THE DEAL WORLD' 'DEALING' 'EAST-WEST' 'MANKIND' 'MONEY' 'MORE MONEY' 'DOW JONES INDEX' 'CATCH TWENTYTWO' 'THE STUPID' 'BLIND AMBITION' 'THE TRAPPINGS' 'TIME IS MONEY' 'NORMAL' 'AGENDA'S' 'AGENDA 21' '1990s' 'OUR COMMON FUTURE' 'DITHER-DRIFT' 'WATER COMPETITION' 'WARMING' 'PEACE' 'DOVE' 'SUMMIT' 'CHARTER' 'ALLIANCE' 'BORDER' 'WORDS' 'EMPTY' 'SOCIAL NETWORK' 'TABLOID' 'ROBOT' 'SOCIAL ROBOT' 'JETSET' 'SHOW BUSINESS' 'FATAL ATTRACTION' 'EARNING' 'SAFETY' 'MOBILE' 'MASSACRE' 'TERROR' 'NEO-NAZI' 'PRIVACY' 'SECRECY' 'FEAR OF...' As many things in our lives seem to come in 3's, herewith also some highly interrelated 6/33's, being the lucky number according to the Kabbalah and the number of perfection, according to Pythagoras:

Three 'true to their nature' examples of a '**straight 6**' are the word **SKY**, written as **321**, the name of the Goddess of the Earth **GAIA**, written as '**3111**' as well as "**A free man thinks**" and "**A Global Spring**"! At a personal level, two outstanding examples of a '**33**' vibration are the names '**Heraclitus**' and '**Celestino Quinto**', the latter the same '**33**' by his formal name '**Celestino V**', the 192nd Pontiff who was elected Pope in July 1294, introduced a few key 'renewals' for the Church but in December of the same year, after only five months of active service, decided that the manipulative 'Scene on the Tiber' was just not his taste and literally fled back to his mountains in the Abruzzo Region. Clearly a universal soul not to be 'had' by earthly manipulative powers!!!

At this point mention should be made of another most important 6-vibration, i.e. the 6/15, called by The Ancients "The Magician" and the interesting thing about this magician is that the numerology of "The Magician" is also a 6/15, and so is the cosmic number for the string of numbers 'ZERO-ONE-TWO-THREE-FOUR-FIVE-SIX-SEVEN-EIGHT-NINE' 'MAN'S BRAIN' 'HAND' 'HIS HAND' 'A NEW WIND' 'PROPOSITION FOR A HAPPIER SURVIVAL OF HUMANKIND' 'THE ENTIRE EARTH THEN WAS OF ONE LANGUAGE AND OF ONE TONGUE' 'RADICAL' 'DEITY' 'NAME' 'WISH' 'QUARKS' 'SUPERCONDUCTIVITY' 'A BEAUTIFUL MIND' 'ARTIST' 'ALIEN' 'THE MASTER' 'OLD FRIENDS' 'TEAM SPIRIT' 'WIN-WIN' 'GAME OVER' 'SAVE' as well as 'THE SEARCH' 'ALL REALITY' 'RATIO' 'NEUROPSYCHOLOGICAL MODEL' 'NEUROANTHROPOLOGY' 'LEARN' 'AWAKE' 'ALL MATTER IS SPIRITUAL' 'METAPHILOSOPHICAL' 'THE SUPERNATURAL' 'ALL THINGS SHINING' 'MAYAN PROPHECY' 'AVATAR' 'ALL IS REVEALED' 'CLARITY' 'LEGAL' 'RIGHT' as well as 'OBAMA' 'I AM A NEW MAN' 'REAL CHANGE' 'SAY NO TO RACISM' 'DUTY' 'CHARM' 'WISE' 'JOKE' 'HINT' 'ODD' 'AN ODD TONE' 'IN ODD WE TRUST' 'SANITY' 'IT FROM BIT' 'JUNK DNA' and.....'EGO' 'SMART POWER' and 'LIVE' 'MAGIC AND MYSTERY' and.....'AWE AND WONDER' and....'ALL IS GEOMETRY' and.....'I AM A GEOMETER' and.....
'IF HUMANKIND WANTS TO SURVIVE IT WILL HAVE TO ADOPT A RADICALLY DIFFERENT WAY OF THINKING' and 'A WELL TEMPERED CLIMATE ACCORD' and 'LEARN TO BE SILENT SO ONE MAY HEAR THE BEAUTIFUL MUSIC' and'AMEN'!!!

At the other end of the 6-spectrum we find a rather strong character in the 6/51, which is often associated with dangerous enemies unrelated to war, and rather telling examples of this vibration are 'CONTROLLING HUMAN DESTINY' 'NOURISHING THE PLANET' 'COMPETITION FOR WATER' and the statement 'THE HIGHER THE SPEED, THE BIGGER THE CRASH' 'CONCEIT AND UNREALITY WALK HAND IN HAND' but also 'COMMUNICATION' 'PHOTOGRAPHY' 'EPISTEMOLOGY' 'TECHNOLOGIES' and 'UNITED WE STAND AND DIVIDED WE FALL' 'TUNNELVISION' 'CONFLICTING MEASURE' and..... 'AND THE LORD SAID LET THERE BE LIGHT' and 'HAPPINESS LIES IN UNDERSTANDING' and 'EVERYTHING HAS REASON' and'NOTHING NEW UNDER THE SUN' 'THERE ARE NO PEOPLE ONLY ENERGY' and.....'**ONE WORLD, ONE HUMANITY, ONE DESTINY' and...'FEARS OF TODAY SHOULD BE SMILES OF TOMORROW' and 'OF COURSE GOD DOES PLAY DICE, BECAUSE HE DESIGNED THEM'!!!**

The three types of '6's are best summarized by one '**straight '6**' in '**I AM**'!

FIVE

THE CURRENT STATE OF AFFAIRS IN THE WORLD

as appearances often betray, Eyesight should learn from Reason, the 5

In my frequent and wide-ranging movements and interactions around this planet in the context of United Nations development activities during the last 33 years, I have frequently wondered why “**Idealism**” as a thought, action and results process, positive as it is generally, albeit often somewhat denigratingly perceived by mankind, never really has had too much to show for it. A good example in this regard is related to the development process between the 1st, 2nd and 3rd Worlds, as instituted after World War II and increasingly at the end of colonialism as we knew it for some few hundred years. I wish to sum up this particular example of largely idealistically inspired human activity in a statement made by the late Robert McNamara in the early 1990’s well after he had retired from the Presidency of the World Bank, when he said: “**The development process as we know it is like a blood transfusion from the sick to the healthy**”. And he was actually crying when he said it!

And we can today all see the result of the process in the form of hunger and abject poverty for about 800 million people, dramatically increasing into being the ‘bottomline’ victims of the current crisis; a hovering on the poverty line of another some 2 billion; increasing local and regional wars and resulting mass migration and displacement of poor people; rampant and increasing diseases; environmental disasters largely due to human causes; loss of forests and biodiversity as well as socio-cultural fabric on a global scale and..... on the other side of the geographic human activity spectrum: burgeoning, if at present very jittery, now already more than a decade, rather dramatic and highly unbalanced financial and economic markets and related soaring joblessness especially among the young, all very much ‘subprime’; unprecedented technological and information society development versus ever more serious and increasingly real climate worries, especially for polar bears!; exploration of deep space but with manned spaceflight in serious peril; ‘mindless enrichment’ of individuals, if only a relatively ‘precious’ few; through pure greed and egotistically driven action.

A global imbalance of the 1st order if you ask me and absolutely nothing to write home about. On the contrary, it should scare more than the wits out of us all but, by all appearances, it does not really. I think that our young people feel it somehow instinctively -especially after the 11th of September 2001- as the global process is starting to nibble at, if not eat into, the edges of their very existence, essence and moreover future prospects. However, it seems that they are still rather reluctant somehow to admit it for now as a larger group, despite the ‘Seattle’s’, ‘Gothenburg’s’ and ‘Genoa’s’ even though the most recent ‘banlieu events’ in France and this year in the U.K. as well as the recent general sharp increase in the alcohol intake by young people clearly show signs of substantial unhappiness, if not alienation, among them. However, they still seem to see a short-term profit in playing the stock market game and accepting the ever-increasing destructive forces of global commerce as it has been set up for them. And rather blindly so I would say but then we cannot blame them too much as it has been largely our own post-war, maybe more precisely post-Vietnam War or maybe even more precisely post-Gulf War, educational doing. Their password to the future seems to be the word ‘consume’, whatever it is and while ‘texting’ their thoughts and experiences at any moment and sometimes, always inadvertently but still, resulting in the untimely death of a contemporary and without much thought to that ‘looming future’. The, once more ‘in the name of God’, and socio-cultural unhappiness-inspired, read emptiness- and ego-driven, recent senseless and utterly tragic massacre of young people also by a contemporary in Norway is a most alarming symptom of how terribly ‘unbalanced’, if not rudderless and certainly humourless, our individualized and polarized (western) societies are!!!

After the major blow dealt to the United States and, as a consequence, to the world as a whole in September 2001 and the ongoing blows being dealt by the same USA to the world and itself, any pronouncement about the future of this our World is largely up in the air. 11-9-2001, a 5/23 like Nature, further imprinted by its more recent aftermath in Madrid and London and wider around in the world, was certainly and undeniably the end of the world as we knew it!!!

The sad and truly worrying reality of the relationship between environment and development is rather overwhelmingly related by Mark Hertsgaard in his recent book “Earth Odyssey; Around the World in Search for Our Environmental Future”. This book provides a detailed, hands-on and geographically balanced account of impressive environmental dangers, as well as their serious underlying and overlying causes, that face us in the years and decades to come on the current path of economic development. This wide-ranging and highly readable book should be compulsory reading at high schools and colleges and more than bed-time

reading for politicians and economists. The added negative complication of all this is that the process of environmental degradation and destruction is currently aggravated and accelerated by that, in all its facets, blinding word 'Power' a '28', described as 'a number of frustrating and puzzling contradictions', like also its 20th Century epitome the 'Military-industrial complex' 'Enemies' 'Parallel 38' 'Death and Destruction' 'Good and Evil' and the words 'Govern' 'Egoland' 'Selfish' 'Human Being' 'Prelate' 'Finance' 'Financial' 'Figures' 'Conceit' 'Greed and Distraction' 'Unreality' and 'The World is blind' 'Climate of denial' 'Duality-Reality' 'The power of fear' 'Tunnel' and 'Business' 'Nuclear energy' as well as 'The fall of Capitalism' 'Fiscal austerity' 'The end of awe' and 'no Mafia, no Party' which, according to their Kabbalah description, are all the same '28', as are also the words 'vacation' 'weather' 'mobility' and 'paradox' as well as 'mentality' 'modern mentality', double '28'! 'divorce' 'disorder' and 'mixed-up world' 'inequality' 'quantum jump' 'cloud computing' and 'Obstacle' 'The Big One' 'See-O-Two' 'Green Climate Fund' as well as 'Creation' 'The God Particle' 'In the Name of God' 'Goddamn' and..... 'Pope' and.... 'Vatican and Communication' 'Survival' and 'The survival of the fittest' and 'Here on Earth'!!!

As 'outstanding and metaphoric' examples of the number '28' I am quoting only two telling names: **Josif Stalin** and **Richard Milhaus Nixon!**

In this context I wish to quote Graham Hancock from his impressive book '**Supernatural**' in which where he talks about the very origins of all religion in which the role of altered states of consciousness played a key role, as follows: **"Once 'religions' abandon, forget or even outlaw he deliberate induction and use of altered states of consciousness, then they lose contact with their roots and wellsprings, and great ugliness and materialism can be expected to ensue."**

I also wish to quote in this connection a statement made by Richard Bach, author of 'Jonathan Livingston Seagull' as well as of his lesser known book '**ONE**', published in 1988, in which he says:

'Evolution made civilization steward of this planet. A hundred thousand years later, the steward stood before evolution not helper but destroyer, not healer but parasite. So evolution withdrew its gift, passed civilization by, rescued the planet from intelligence and handed it back to love'

And a little bit further on:

'Civilization was a dear culture in so many ways, a gifted society, trapped at last by its greed and lack of vision -the first version of space telescope Hubble with its 'nearsighted glasses' was a perfect symbol of mankind's level of vision!!! (my addition).- It ravaged the forests into desert, consumed the soul of the land in mine pits and waste, smothered its air and its oceans, sterilized the earth with radiation and poisons and modifies Nature's nature with bio- and nanotechnological experiments. A million million chances it had to change, but it would not. From the ground it dug luxury for a few, jobs and no-jobs for the rest and graves for the children of all.'

"In the end, the children did not agree, but the children had come too late"

Richard Bach wrote his book well before the UNCED Conference in Rio de Janeiro in June 1992 where the Earth's environment was discussed by a most 'impressive' gathering of Heads of State and World 'Leaders' in relation to a wide variety of development issues. However, to this day early in the 3rd Millennium too little and certainly to no true avail, and certainly not for want of words and "converted trees" spent on the subject. Moreover, the jury is still very much out on the effect of 'Johannesburg', ten years after 'Rio', as our 'leaders' consistently do not 'put their money where their mouth is' and very much lack the much needed 'art of the long view'!!!

What to do at the very beginning of the 3rd Millennium after having, during the last some hundred years, degraded both our own as well as Nature's nature to the point that oblivion hangs as the sword of Damocles, some call it 'globalization', others more recently 'the clash of civilizations', above us all, both in the socio-economic-political as well as the environmental sense. Don't get me wrong, there is a lot of good and very good at both the individual as well as community level, and in my observation especially among the poor, but there is far too much bad and very bad, especially among the rich and powerful and the highly dangerous polarization between the two seems to have truly accelerated itself at 08.48 am on the 11th of September 2001 in the City of New York, currently celebrating its 400th anniversary and being the true

symbol of human organization and endeavour, at least so far in our history. The logical sequel to 9/11 have been the Iraq and Afghan wars with the military industrial-complex playing out its destructive forces, read interests, on a grand scale and, in parallel, Wall Street 'blinding' western humanity into let's call it the 'Subprime Event', originator of the global financial-economic 'tsunami' and the G20 in London nor the much heralded, if 'shaky' G8 in L'Aquila in Italy's devastated Abruzzo Region have been able to do much to neither 'stem nor turn the tide' for the time being. In 'reborn' Pittsburgh, a '29' called 'Grace under Pressure', the G20, under President Obama's inspiring direction, took some important corrective steps towards a more balanced common future for the world community. How that will work out 'in Reality' is still a wide open question and clearly a matter of precious time indeed and hopefully we shall arrive in a better world when that time comes!!

SIX

THE DARK SIDE OF THE COSMIC COIN

there are rumours and stunning examples of 'perfection' recently

Before making the Dealism point and what it could mean for humanity in various ways, it may be useful and enlightening to highlight the other side of the cosmic coin, i.e. the dark side. I will do that by enlightening you to some extent about the characteristics of another three numbers which, according to The Ancients, have the most difficult symbolism to deal with, being the numbers '16', '18' and '43'.

The number '**16**' is described as '**The Shattered Citadel**'. This number, which was also called by the ancient Chaldeans as 'A Tower struck by Lightning, from which a man is falling, with a Crown on his head', is representative of destruction and haven't we seen the Tower and its twin falling recently!!! It warns of a strange fatality, also the danger of accidents and the defeat of one's plans.

Below are a number of words and names which have this fateful vibration:

'So I am' 'Child' 'Fear' 'A culture of fear' 'Angst' 'Anger' 'The Enemy' 'Hell' 'Killer' 'Rape' 'Snake' 'Lust' 'Fake' 'Hurry' 'Rush' 'Africa' 'Bay of Pigs' 'Russia' 'Tibet' 'Japan' 'Fuji' 'Kobe' (the Japanese city virtually destroyed by an earthquake in 1995) 'Daiichi' 'L'Aquila' 'San Andreas Fault' 'Algeria' 'Shiva' (the Indian god of destruction), 'The Camorra' 'Dark Force' 'Islamic' 'Cult' 'Dark Art' 'Media Hype' 'Blind Faith' 'Waco' 'Fire' 'Urban' 'Atom' 'A-bomb' 'The Alcohol' 'The Oil' 'Oil Men' 'Oil and Money' 'Oil Weapon' 'Black Sun' 'Trade' 'God Dollar' 'Man and Nature' (how very true!!!) 'CFKs' 'An Inconvenient Truth' 'Katrina' 'Mad Cow' (both by the word 'Cow' as well as 'Mad Cow') 'H5N1' (the avian flu virus) 'Cat and Mouse' 'Ratko Mladic' (the Serb general who led the destruction of Bosnia, both by his first as well as second name). Furthermore, the names 'Bill Gates', also a double '16', both by the name Gates as well as Bill Gates, 'The Capitalist' 'A lot of money' 'The Rich' 'Our Greed' and the names 'Bush' 'Dick Cheney' 'The Regime' 'Blair-Bush' 'Twin' 'Trade' 'The Pentagon' 'War or Terror' 'Osama' 'Al-Qaeda' alias 'The Base' 'Navy Seal' all same '16', 'The Hezbollah' 'Camp' 'David' 'Third' 'Reich' and 'War Games', a double '16', and 'Dirty Game' 'Italy-Europe' 'The Arrogance' 'Than Shwe' 'Mao Zedong' 'Kagame' 'Kim Jong-un' 'Ego-Power' 'Legal obstacle' 'The Stress' 'The Paranoid' and 'Bad People' as well as 'An Inconvenient Truth'!!!

There are undoubtedly many more telling '16's' around but probably this gives you a feeling for its rather awesome and destructive character. There are many other connections between disastrous happenings in the world related to this number in various ways. For instance, Pompeii was destroyed in 79 (=16) A.D., the symbolic year 1492, which led to, 'in the name of God', tremendous destruction in the America's wiping out entire civilizations, adds up to 16 and the Roman Catholic Church in 1600 put Giordano Bruno to the stake for his 'considered and realistic beliefs' and started its fierce process of silencing Galileo Galilei in the year 1616. Another interesting historical example is the fact that the year 1672, which adds up to 16, is in dutch history books called 'Het Rampjaar' or 'The Year of Disasters'. Yet another telling '16' is the year '1933' when Hitler rose to destructive power in Germany. The plane that carried John John Kennedy and his family into their destiny disappeared from the radar on 16 July 1999, just to recall a tragic happening that attracted global attention.

The number '**18**' is called '**Spiritual-Material Conflict**' and is reported to have the most difficult symbolism to translate of all numbers in the system. 18 symbolize materialism striving to destroy the spiritual side of nature and are associated with wars, social upheaval and revolution. Below only some examples of this vibration which however fully tell the story in my opinion: '666' 'www' 'The Industrial Revolution' 'Fate' 'Drugs' 'Pills' 'Virus' 'Anarchy' and 'Water' (the next world war is in all likelihood to be about water resources) 'Black Gold', the common synonym for oil, as well as the entities '21st Century' 'The World' 'West' 'Us-Them' 'Wall Street' 'Graft' 'To make money' 'CDO Subprime' 'Acts of Man' 'Debt Ceiling' 'Debt Addiction' 'Fear and Greed' 'Market' 'Arctic warming' 'Elite' 'Ego's' 'Hacker' 'Texas' 'Dubai World' 'Kashmir' 'Spiral' 'Fame' 'Freak' 'Laden' 'Nine Eleven' 'Jesus' 'Christ' 'Cross' 'Saddam Hussein' 'Blair, Bush and Berlusconi', 'Cosa Nostra' 'Military Power' 'Shebab' and the words 'Ruler' 'Kim Jong-il' 'Flags' 'Void' 'The cautious' and 'Error' 'Fear and Uncertainty' as well as 'TV-Violence' 'Idols' 'The Doctrine' and the concept 'Civil World' as well as the city names 'Rome' and 'Berlin' and the figure of

‘The Buddha’.

These examples seem to be rather telling of the difficult 18 vibration and I will not further dilute this picture with other examples but there are enough similar ones.

The number ‘43’ has the shortest description of all numbers which goes as follows: ‘The Ancients’ claim this is an unfortunate number, and if a name equals a 43, the spelling should be changed to equal a more fortunate compound number. It is symbolized by the tendency, like the 18, towards revolution, upheaval, strife, conflict, and war.”

Less than a decade ago, late in that ‘key turning year’ 2000, the world watched in both astonishing and hilarious disbelief the most elaborate and conflictual ‘election’ of George W. Bush as the 43rd President of the United States of America. Another significant ‘43’ vibration is the word ‘Superpower’ as well as the expression ‘Respect for Nature’, ‘Inconvenient’ as well as the words ‘Monopoly’ ‘Consumerism’ ‘Technology’, ‘Intelligence’ ‘Extraterrestrials’ ‘Administration’ ‘Supervisor’ and ‘Interpreter’ and we all know the conflictuous nature of these characters! Lastly and I think most impressively because of its recent actuality, the following string of numbers: 08.48-11-9-2001, i.e. the exact time when the airplane struck the first Twin Tower, is also a ‘43’ and so is, lo and behold, the US-‘led’ global coalition’s response in ‘Operation Enduring Freedom’ and ‘Millennium Challenge’, the large scale military exercise to prepare for the Iraq conflict. ‘Antropocene’, the term coined in 2000 by Nobel laureate Paul Crutzen to represent the current geological era dominated by man, is most interestingly a ‘43’ and so is the word ‘Monoculture’! In this connection also the words ‘Conspirator’ ‘Resolution’ ‘Destructive’ and ‘Explosive’ ‘Geronimo Ekia’ ‘Fukushima Daiichi’ and the generic statements ‘Government of...’ ‘Management of....’ ‘Manipulation of....’ ‘Controlling’ ‘Conflicting’ ‘Follow the money!’ and the statements that ‘Serious trouble begins generally in the Minds of Men’ ‘Bloodthirsty’ ‘Reputation’ and ‘Poverty breeds Violence’ and ‘Prostitution’ ‘Pedophilia’ ‘Parasites of Heaven’ as well as the expression ‘Money is a function of false time’, the combination ‘Politicians-Economists’ ‘Monkeybusiness’ and ‘Frustration’ and ‘Enough quite Enough’, all carry the same ‘43’ vibration!!!

A telling example of a ‘**straight 7**’ is the word ‘**Overpopulation**’ as well as.....’**Big Business**’ and.....**the statement ‘Organized Religion is like Organized Crime; it should not exist yet it does and it Moves’!**

SEVEN

TURNING THE COSMIC COIN ONCE MORE SUNNY SIDE UP

the United Nations of the World are in urgent need of more spirituality

The following words, composed by Percy Bysshe Shelley in his “**Hymn to Intellectual Beauty**” written about two hundred years ago, are likely to form the best introduction to this chapter in which I hope to turn your attention to the more beautiful and positive side of what the cosmos has in store for us all but which we increasingly seem to literally lose sight of and contact with:

**Spirit of Beauty that dost consecrate
With thine own hues all thou dost shine upon
Of human thought or form, where art thou gone?
Why dost thou pass away, and leave our state,
This dim vast vale of tears, vacant and desolate?**

Shelley’s words, which clearly came from the heart, lead me to introduce you to another four cosmic numbers of key importance, being: the 19, called ‘The Prince of Heaven’; the ‘30’, called ‘The Loner’; the ‘26’, called ‘Partnerships’ and the ‘27’, being ‘The Sceptre’.

The number ‘19’, a Sun vibration, was described by The Ancients as one of the most fortunate and karmic reward numbers and it should be no surprise that the word ‘BEAUTY’ is a ‘19’ as well as ‘INNER BEAUTY’, a double ‘19’. Other ‘19’s are the words ‘SPIRIT’ ‘SOUL’ ‘THE SOUL IS ...’ ‘THE SOUL’S CODE’ ‘LIGHT ENERGY’ ‘FIAT LUX’ ‘DNA MOLECULE’ ‘DNA SPIRAL’ ‘IGF-II PROTEIN’ ‘THE BODY’ ‘REALM OF THE SPIRIT’ ‘SELF’ ‘INNER SELF’ ‘DREAMS’ ‘THE DREAMER’ ‘LULLABY’ ‘LIFE AND DEATH’ ‘ODD AND EVEN’ ‘THE MIND’ ‘MIND’S EYE’ ‘KEEN EYE’ ‘CLEAR MIND’ ‘MIND YOU’ ‘GREY CELLS’ ‘WOW!’ ‘TIME AS MULTIPLIER’ ‘THE NATURE’ ‘POLY’ ‘THE GOD’ ‘CODE’ ‘THE SECRET CODE’ ‘REALISM’ ‘THE HUMAN GENOME’ ‘HELIX’ ‘TRUST’ ‘FAITH’ ‘FACTS’ ‘WORD’ ‘MANDALA’ ‘DIGNITY’ ‘THE SUN’ ‘SOLAR PLEXUS’ ‘THE MOON’ ‘SUN-MOON’ ‘SHINE’ ‘WE ALL SHINE’ ‘BLUES’ ‘FUN’ ‘SO LONG’ ‘1960s’ ‘UP AND DOWN’ ‘PRIMARY’ ‘ENJOY’ ‘GIVING’ ‘SMILES’ ‘GIVE AND TAKE’ ‘SEARCH’ ‘WHY WORRY’ ‘SHELL’ ‘LIVING’ ‘CHAOS’ ‘INERTIA’ ‘RESET’ ‘1927’ ‘SEARCH’ ‘SPEAK’ ‘MAKE A WISH’ ‘WORD’ ‘PRAYER’ ‘EDEN’ ‘MAKING LOVE’ ‘WITH LOVE’ ‘MAKING SENSE’ ‘USE AND DISUSE’ ‘SINGER’ ‘PAINT’ ‘GUIDE’ ‘ANIMAL WORLD’ ‘WE ARE...’ ‘TWO HEARTS’ ‘ACT OF GOD’ ‘THE DIVINE CREATION’ ‘FATA MORGANA’ ‘MIRACLE’ ‘LAST-DITCH’ ‘APPIA’ ‘REGINA VIARUM’ ‘CASTLE’ ‘NEW YORK’ (although composed of a destructive ‘16’ and a ‘12’ ‘The Victim’!) ‘ELDER’ ‘THE GUARDIAN’ ‘KABBALIST’ ‘MASTER’ ‘SHAMAN’ ‘ANIMISM’ ‘THE DREAMER’ ‘THE GENIUS’ ‘HERO’ and ‘MAGICIAN’ ‘GENIE’ ‘GAME CHANGER’ ‘ALL GOOD THINGS COME SLOWLY’ and ‘IN-TIME-IN-TUNE’ and ‘ALL IS ONE’ and ‘BACK TO THE FUTURE’ ‘GOD DOES PLAY’ and ‘CHIN CHIN’ and no more needs to be said to prove the point.

To put a human, and for that matter a very human, face on this vibration, no less than Albert Einstein was, and still is of course, a ‘19’ and wasn’t he the very ‘Prince of Heaven’ in modern science?! It can hardly be a coincidence that Einstein's General Theory of Relativity, which earned him the Nobel Prize as well as immortality, was formally recognized in the year 1919. Four other globally known and highly esteemed ‘19’s are ‘Darwin’ ‘Baruch’, Spinoza's first name, ‘Dalai Lama’, ‘Luigi Einaudi’ ‘The Beatles’ as well as ‘Paul McCartney’.

A beautiful, if not touching, example of a ‘**straight 1**’ is the statement “**I BELIEVE**” and, free after Lao Tzu: “**When Heaven and Earth are united sweet dew of love comes down**”

The number ‘30’, a high energy Jupiter vibration, is clearly destined to apply this energy largely to higher purposes. Typical examples of this powerful vibration, limited to a representative selection, are:

‘OF COURSE GOD PLAYS DICE’ ‘SINGULARITY’ ‘WORMHOLE’ ‘EXTERNAL PRINCIPLE’ ‘HIGHER PRINCIPLE’ ‘SELF-ORGANIZING HIGHER PRINCIPLE’ ‘THE PRINCIPLE WAS THE WORD’ ‘LIGHT IS THE VERY MATTER OF CREATION’ ‘HERMETIC CODE’ ‘PENTAGRAMATIC PARADIGM’ ‘BRIDGING THE DISTANCE BETWEEN PHYSICS AND METAPHYSICS’ ‘LOGOS IS ALPHA AND OMEGA’ ‘GRADUS AD PARNASSUM’ ‘MATHEMATICAL TRUTH’ ‘MATHEMATICAL TRUTH PRINCIPLE’ ‘ZERO EQUALS

To have a feeling for the power of this vibration one only has to remember the names Marcus Tullius Cicero, Quinto Orazio Flacco, Michel de Nostradame, Descartes and Baudelaire!

The '26', which adds up to the number '8', a Saturn vibration and the number of Destiny as well as the 'Big Bang', 'A scalar field' 'Big Picture' 'Everything is rational Number' 'Number is the within of all things' 'Holomovement' 'Metaphilosophy' '*Ars combinatoria*' and 'Supernatural Being' 'Dimethyltryptamine' 'Telecommunications' 'A Global Thinker' 'A Futurist' 'I am free!' 'Interdependent' and 'Life is what one pays attention to' as well as 'Opportunity' 'Re-Search' 'Understanding of Reality' 'A Paradigm Revolution' 'There are no Problems just People' and 'Verification Principle', 'To be or not to be, that is the question' 'At Home' 'Say No' and 'A Mayan Cosmogenesis' and 'Isis' carry the name 'Partnerships' and the following '26' vibrations may provide an insight in this important cosmic character in the context of human relations and endeavour:

'HUMAN DESTINY' 'SPACE AND TIME' 'NUMBERS, SPACE AND TIME' 'NUMBERS, SPACE, TIME AND GRAVITY' 'DODACAEDRE' 'NUMBER AND SOUL' 'TETRAKTIS' 'DO-RE-MI-FA-SOL-LA-SI' 'OCTAVE' 'HEMIOLA' 'METRICAL IMPULSE' 'DIATONIC' 'COGNITIVE RESONANCE' 'CONSONANCE' 'PENTAGRAMATIC ORDER' 'MUSICAL NATURE' 'MUSICAL START' 'HERMETIC UNIVERSE' 'CERTAINTY PRINCIPLE' 'THE NAME OF THE GAME' 'ZOON'(the ancient Greek name for a living Universe) 'INFINITY'

Significant human ‘26’ vibrations are found in the persons of ‘Elohiym’ ‘Pythagoras’, ‘Ernest Henry Shackleton’, ‘Martin Luther King’ and in the former Secretary-General of the United Nations, ‘Kofi Annan’, and the same holds true for the word ‘Secretary’ itself. Furthermore, the fact that ‘Kyoto Protocol’ is an 8/26 speaks entirely for itself!

A meaningful example of a ‘straight 8’ is the name of the 17th century leading mathematician and philosopher Gottfried Wilhelm von Leibniz as well as the currently actual global problematic ‘temperature increase’!

Another important ‘8’ worth mentioning here is the 8/17, called by The Ancients **“The Magic Star of Venus”**. This is a highly spiritual number, and was expressed in symbolism by the ancient Chaldeans as the 8-pointed Star of Venus. The Star of the Magi is the image of Love and Peace and the following examples of this vibration are quite self-evident:

‘ONE’ ‘TWO’ ‘REALITY’ ‘EARTH’ ‘UNITY’ ‘LIFE’ ‘HEART’ ‘CORE’ ‘GOLD’ ‘MUSIC’ ‘ALL IS NUMBER’ ‘A PERFECT FIFTH’ ‘MINDS’ ‘LOGIC’ ‘THE TRUTH’ ‘TRUE’ ‘THE ACTION’ ‘HERE’ ‘CIRCLE’ ‘MACRO’ ‘MICRO’ ‘SAFE’ ‘BRIDGE’ ‘LEAP’ ‘THINK’ ‘LIGHT-BEARING’ ‘MORAL’ ‘NEW REALISM’ and.....’I HAVE A DREAM’

Just one up in the level of cosmic vibrations, we find the extremely powerful, however benevolent, ‘27’, called ‘The Sceptre’. The Ancients describe this Mars vibration as an excellent, harmonious and fortunate number of courage and power, with a touch of enchantment. It blesses the person or entity it represents with a promise of authority and command. It guarantees that great rewards will come from the productive labours, the intellect and the imagination. Below you will find a number of telling examples of this vibration from which you will be able to get a feel for its power and benevolence:

And to give you an idea that 'number' does not exclusively apply to the English language, herewith a most beautiful Italian example of a '27': **"La parola bella e nata insieme a te"** which has 'by chance', which, there being 9 numbers is only 11%, exactly the same '27' vibration as its English translation **"The word beauty was born with you"**! On a personal level, for the '27' one only has to mention the names 'Solomon', 'Song of Songs' 'Hermes Trismegistus' 'Quetzalcoatl', 'Plinius', 'Jesus Christ', 'Jesus of Nazareth' 'Darwinism' 'Templar' 'Michelangelo', 'Diderot', 'Wounded Knee' 'Elvis Presley' and 'John Kennedy', as well as the name 'Kennedy' itself and, yes, 'Camelot' and....'Pooh' as having this vibration and the penny will drop automatically. At an institutional level these are considered self-explanatory: 'The Oval Office' and ...'The Black White House'!

THE NUMBER NINE

the number nine, the Cosmic Servant and Master of Heaven and Earth

The ultimate number '9', earlier proposed to be called 'The Force' has very special and unselfish characteristics by the fact that when the number 9 is added to another number, it does not change the basic nature of the original number. For example if 9 is added to the number 14 ($1+4=5$) we get 23 and $2+3 = 5$ again. The number '216' (= $6 \times 6 \times 6$) which adds up to '9' was in antiquity considered the Number of Creation as impressively documented by Petur Halldarsson in his 2007 book 'The Measure of the Cosmos'. Furthermore, the number nine shows up everywhere in the workings of the Universe which may be exemplified by the following, not necessarily exhaustive, examples:

$$0+1+2+3+4+5+6+7+8+9 = 45 \text{ and } 4+5=9$$

$$9 - 8 - 7 - 6 - 5 - 4 - 3 - 2 - 1 - 0 = -27 \text{ and } 2+7=9$$

$$1 \times 2 \times 3 \times 4 \times 5 \times 6 \times 7 \times 8 \times 9 = 362880 \text{ summed up} = 27 = 9$$

The great wheel of time, i.e. the time that it takes to complete one full astrological period, is said to last 2160 years, one twelfth of a Great Sidereal Year and $2+1+6+0 = 9$.

The human gestation period is on the average 9 months

The human mean normal respiration rate is 18 times a minute and $1+8=9$.

The mean normal heartbeat or pulse rate is 72 times a minute and $7+2 = 9$.

The average number of heartbeats per hour is 4320 and $4+3+2+0 = 9$.

In 24 hours, our heart beat on the average 103680 times and we have a 9 again.

In the same 24-hour period, respiration occurs an average of 25920 times, another 9 and exactly the same number of times as there are years in a Great Sidereal Year. The number 12.960.00 was the biggest, and sacred, number in the mathematical system of the Sumerians and it adds up to 9. The Earth rotates the Sun in 365.2425 days, the digits of which number add up to $27 = 9$. The Moon rotates the Earth in 29.530593 days which adds up to $36 = 9$. In this connection the Sumerian 'Planet of the Gods', Nibiru, which reportedly appears in our solar system every 3600 years with a 'determining influence' 'produces' another 9. The number 9 shows up in various ways in the movements of planets and represent the Mars vibration, implying aggression – penetration – Man. Its inverse, the number 6 represents the Venus vibration, implying love – compassionate passivity – Woman. When the number 6 is added to the number 9, the result is 15 and $1+5 = 6$ and Conflict is destroyed and Love is victorious.

Another important '9' in the system is the ever mysterious number Pi, numerologically an 8 and a 1 which adds up to 9. Moreover, both the first 4 digits of Pi, 3,141 add up to 9 as well as the first 9 digits 3,14159265 which add up to the number 36, the sum of which equals 9. In 2002, Pi, being an endless random repetition of the numbers 0-9, has now been calculated to 1.2411 trillion decimal digits, yielding another 9. Since January 2011 there is a new record at 5 trillion digits by a Japanese wizard!

Pi's 'colleague' Phi, established by the Greek sculptor, painter and architect Phidias in the 5th century B.C., is known as 1.6180339887, the most stable irrational number which adds up behind the decimal -with a nice '33' right in the middle- to $54 = 9$ while the entire fractal adds up to $55 = 11$!

The International Second (IS) is defined as the number of vibrations, being 9131692770, which the caesium-133 atom makes per second. This large number starts with a 9 and all digits add up 45, a 9 again.

In his recent book "Libro delle Epoche"- '2012. La Fine del Ciclo delle Ribellioni' Igor Sibaldi convincingly documents the history of the western world on the basis of a 72 (=9) year cycle with rather stunning precision.

Mention should be made here of the earlier described '27', the "Ouraborus", already spoke of by Plato and referred to in the literature by Sir Martin Rees in his extremely well-written and enlightening book 'Just Six Numbers' as the "emblematic serpent of ancient Egypt and Greece, represented with its tail in its mouth continually devouring itself and being reborn from itself. It expresses the unity of all things, material and spiritual, which never disappear but perpetually change form in an eternal cycle of destruction and re-creation". Another highly interesting '9' in this connection is that in the Ouraborus all matter in both the microworld and the macrocosmos can be found between the sizes of 10 to the power minus 20 and 10 to the power 25 and if we add 20 and 25 we get 45 and by adding these two digits a 9 again. And finally, the long term average year lasts 365, 2425 days which adds up to $27 = 9$. Finally, the number 4.320.000.000, which adds up to 9 and also contains Pythagoras' key number 4, 3 and 2 as forming the basis of Life, represents in

Hindu mythology the period of the hermetic line of time.

Below are some further examples of '9' vibrations to further demonstrate the point of both its historical and actual significance:

'PHILOSOPHER' 'PHILOSOPHY-PHYSICS' 'PROPORTIONS' 'ANTHROPOLOGY' 'COSMOLOGICAL PRINCIPLE' 'ANTHROPIC COSMOLOGICAL PRINCIPLE' 'ELECTROMAGNETISM-GRAVITY-INERTIA-QUANTUM MECHANICS' 'MARIA' 'INRI' 'IHS' 'PRINCIPLES OF HEAVEN' 'SIX' '72' '144' '216' 'YIN AND YANG' 'CHI' 'I:CHING' 'IN LOVE' 'VIA APPIA' 'PI' 'A CIRCLE' 'ADD' 'A KEY' 'E.T.' 'A GOOD TIME'!!!

And with that we can probably turn to the next chapter to approach the bottomline of this short treatise.

NINE

DEALISM: AN APPROPRIATE '21' PHILOSOPHY FOR THE 21st CENTURY?!

and new philosophy puts all in doubt

On the basis of Aristotle's many thoughts, the Ancient Greeks invented and established 'Dualism', stating that everything existed with an opposite: love versus hate; good versus bad; light versus dark, etc. etc. This simple 'mistake' has created the concept of separation for modern mankind and we all know the tragic consequences of that mistake ever since the Greek civilization! If I now tell you that the word 'Dualism', as well as 'Mankind', 'World' and 'Money' and 'Peace' have the blinding '22' cosmic vibration, described earlier, we should of course not be so surprised about the course of history during the last 2400 years or so. Jesus Christ tried his very best and even gave his own life but the bad and polarizing influence of the separatist thought had been properly sown and installed. Because of its similar vibration, this happened kind of 'naturally' in the minds of mankind inhabiting the world at that stage and the power struggle was on with fear as one of its key driving forces, not to speak of the 'ego-force', a similar '22'.

The 'Dualism Principle' has, among other things, clearly led in politics to the 'Divide and Rule' tactics, mastered in various imperialist 'civilizations' and highly actual in 2003 with President George W. Bush declaring unilaterally that the World 'was either with America or with any terrorist'. As if there was nothing else in the world!!!

At the Millennium changeover a few years ago humanity spent considerable energy and resources to overcome the global fear of the Y2K bug and entered the 3rd Millennium. Undoubtedly this inspired new hopes for our common future, only to be rather shattered 21 months later. On the basis of what we see and hear around us in recent years, it seems that there is a deeply perceived need for a radically new approach to counteracting drifting individualism, the ever-increasing mindless and certainly soulless quest for 'money' and 'power', that champion '22' and the highly frustrating and contradictory '28', same as 'military-industrial complex' and 'financial' and the dominance of 'technology', the highly conflictuous '43'. This radical change requirement has only been exacerbated by recent global events and repetitively underlined in order to better the human condition in the natural world in the much-revered 21st Century. After all, $2+1 = 3$; this is called the number of the Mind. In ancient geometry it is linked to the triangle, the symbol of logic, intellect and reason. In the number account of creation, God, i.e. Nature, is believed to have called upon the power of 3 to give consciousness to his creations on Earth.

Based upon the deliberations in the previous eight chapters, one approach to this could be to establish a practical and consistently functioning bridge between philosophy, science, religion and politics by recognizing and formally agreeing at all levels of human organization and endeavour that there is a common basis for all that is happening under the sun. And this can indeed be built on the wisdom of our more powerful philosophically oriented ancestors from Pythagoras, Plato, Spinoza, Einstein, Gandhi and beyond, by simply using the rather 'awesome power', that communicative '32', of the 1st Law of Pythagoras and the related cosmic insights of the old Chaldeans, who clearly benefited from unpolluted clear skies as well as clear minds in their interaction with the Universe. I get extremely concerned when I read in the leading media that some 30% of humankind, and it happens to be that part of humanity which has for now the principal decision-making power in the world, cannot observe our own galaxy the Milky Way anymore. Reason: various types of pollution, including light pollution, as a major cause by now. No wonder that we lose touch and become increasingly self-centred in the process!!!

What if we, as humankind, living on one and for the time being irreplaceable planet, could agree on a truly common approach to diminishing the bad influence of the EGO! This could be done very subtly, for example by cutting off the 'I' from the word IDEALISM, resulting in the word DEALISM, which according to the thesaurus does not exist and therefore can be created. Similarly, an IDEALIST would become a DEALIST; an IDEOLOGY will become a DEOLOGY, a strong and high-energy 3/30, an Idea will become a Dea, the 1/10 called 'The Wheel of Fortune', Fortune', and would clearly suggest the presence of divinity in our thinking, and an IDEAL will become simply a DEAL, a '13' called by The Ancients 'Regeneration and Change' and recognized as a key number by the Mayans who made a rather significant 'world-changing' prediction for the end of 2012, a mere good year away!

And let's face it, in reality we are already very much on this way of thinking and acting but of course all deals would have to be absolutely above-board as we would be fully aware that all would be directly watched over by the Deities themselves. Maybe it is only that our "bread-and-butter" everyday life needs a more clearly commonly defined, practically implementable and recognizable spiritual dimension. Maybe that is just indeed all there is to it to control our rather insatiable ego's and bring about the required degree of humility and gratefulness and associated freedom to be here for a while as well as a sense of responsibility for our 'common good', which leaves much to be desired as we know all too well! Accepting Dealism, after all synonymous to 'Global Culture', as a truly mainstream philosophy for humanity as 'One Whole' would also allow for repairing the historical Greek mistake in establishing Dualism. And, probably just by chance, the two names are quite similar even if they are totally different in concept and cosmic vibration. Maybe it is indeed time that we collectively grasp the deeper meaning of the word UNDERSTAND, i.e. to acknowledge and accept to 'stand under a 'Higher Principle'!

There are a number of advantages in this spelling change of that key word 'IDEALISM' under which people often 'sell' and 'buy' the funniest things to and from each other. First of all, the cosmic vibration, as well as that of DEALIST, would change from that blinding, damaging and full of mistakes and moreover fateful '22' to the blessed and universal '21'. That would be, as you may have been able to deduct from the above, a major improvement and would land it in very good company, such as, among others, love, truth, human, sense, good, pure and ethics.

Furthermore, as the word Dealism itself indicates, it suggests a link to the Deities which could serve the purpose of maybe better understanding and accepting our proper place in the god-given, i.e. natural scheme of things. Thirdly, it can be considered, as it does not exist yet, as something completely new which always has the potential of having a spiriting effect, like the 'New Deal', launched by Franklin D. Roosevelt in the 1930's in response to that economic crisis, had in most amazing ways on the entire American nation, and the world for that matter, in a very difficult time with very little hope for the future. And Roosevelt had essentially only the radio as a means of communication!

Dealism, and its related offshoot, if introduced in the right way, using currently available mass-communication technologies at various levels, through the awesome communication power of the internet, schools, institutions of higher education, social and cultural as well as personal and business networks and, very much so, the beleaguered United Nations system, may well have the potential of achieving that radically different way of thinking that Albert Einstein was referring to. A kind of, unlike in his case, fairly easily achievable philosophical-socio-economic-scientific-technological-environmental-religious-political, for short all-in 'Unified Field Theory'. 'Father Albert' tried to achieve this but did not manage to put it together in the area of Physics in his lifetime.

If such a proposal could be accepted at the various levels where 'pulling the strings' would result in concrete and consistent action, there would be a few other key vibrations we might change in the process, such as the highly sensible replacement of the gender unfriendly word 'MANKIND', a 'blind 22', by 'HUMANKIND', a 'lucky' and universal '33' and essentially nothing else than the implementation of the much talked about but little acted on 'mainstreaming of gender'; if we could agree on leaving the 'Y' off the word 'MONEY', that would generate another rather key '21' and if we replaced the word PEACE by 'PEACE OF MIND', being the very basis of peace altogether, we would have another '33' instead of a '22'. There are undoubtedly more good things to be achieved by some simple linguistic surgery but it is left here for now for the sake of simplicity.

In his 2006 book "A Return to Subjectivity" John F. Caddy presents a TONE (= 21) (Theory Of Nearly Everything) on the nature and workings of the Universe. He summarises Einstein's general theory of relativity with "you can't get there from here", implying the need for a paradigm shift or 'gestalt switch', both powerful and benevolent '27's!

Attention is to be drawn to an interesting 'coincidence' at this point. Pythagoras mentioned in his time that the working of the Universe could be compared to the "plucking" of a string. The latest advanced 20th century physics theory, the so-called 'M-Theory' as well as the 'E-Frames' postulated earlier by Sir Arthur Eddington, both numerologically a 1/10, indicating 'origins' and built on Einstein's theory of general relativity, has as core principle that the Universe functions as an 11-dimensional space of supergravity, related to a 10-dimensional space of 'strings'. The connection with our story here is that the word 'STRINGS' is also a '21' and my gut feeling, already put on the 'table' by Pythagoras, is that our physicists may well be on the right track here!!! An interesting 'anecdote' on the (non)-existence of God in this regard

goes as follows:

“Paul Adrien Maurice Dirac (1902-84) once said ‘God used beautiful mathematics in creating the world’. Heisenberg recollects a friendly conversation among young participants at the 1927 Solvay Conference about Einstein and Planck’s views on religion. Wolfgang Pauli, Heisenberg and Dirac took part in it. Dirac’s contribution was a poignant and clear criticism of the political manipulation of religion, which was much appreciated for its lucidity by Bohr, when Heisenberg reported it to him later. Among other things, Dirac said: ‘I cannot understand why we idle discussing religion. If we are honest—and as scientists honesty is our precise duty—we cannot help but admit that any religion is a pack of false statements, deprived of any real foundation. The very idea of God is a product of human imagination.... I do not recognize any religious myth, at least because they contradict one another....’ Heisenberg’s view was tolerant. Pauli had kept silent, after some initial remarks, but when finally he was asked for his opinion, jokingly he said: ‘Well, I’d say that also our friend Dirac has got a religion and the first commandment of this religion is ‘God does not exist and Paul Dirac is his prophet.’ Everybody burst into laughter, including Dirac.”

Maybe it is about high time that we accept the ‘Principles of Heaven’ as our own everyday life principles in order to achieve a harmonious balance in living in and with this essentially natural and beautiful world and its surrounding Universe. It seems to me that this deep-seated, instinctive wish is somehow reflected in the many things we do, such as our increasing conquests in space and, closer to home, the erection of ever higher skyscrapers, even though other forces take them down here and there. Don’t these clearly reflect attempts to be ‘in touch’ with the heavens as symbols of hope that have the true power of determining both our common fate and destiny? Or are they just the fruits of the mere blind ego-drive for more and more power, visibility and drive for domination?!

In my opinion this was already deeply felt by the British philosopher James Allen who, in 1902, timewise well into the effects of the industrial revolution and ten years before the epitome of this era, ‘The Titanic’ met his ‘Natural Master, the Iceberg’, a ‘21’, wrote the following in three parts in his little but very important book “**As a Man Thinketh**”:

Part ONE:

“Let a man cease from his sinful thoughts, and all the world will soften towards him, and be ready to help him; let him put away his weakly and sickly thoughts, and lo! opportunities will spring up on every hand to aid his strong resolves; let him encourage good thoughts, and no hard fate shall bind him down to wretchedness and shame. The world is your kaleidoscope, and the varying combinations of colours which at every succeeding moment it presents to you are the exquisitely adjusted pictures of your ever moving thoughts”

Part TWO:

**‘You will be what you will to be;
Let failure find its false content
In that poor word ‘environment’
But spirit scorns it and is free.**

**It masters time, it conquers space;
It crows that boastful trickster, Chance,
And bids the tyrant Circumstance
Uncrown, and fill a servants place.**

**The human will, that force unseen,
The offspring of a deathless Soul,
Can hew a way to any goal,
Through walls of granite intervene.**

**Be not impatient in delay,
But wait as ONE who understands;
When spirit rises and commands,
The Gods are ready to obey.’**

Part THREE:

‘In all human affairs, there are efforts, and there are results, and the strength of the effort is the measure of result. Chance is not.’ Gifts’, powers, material, intellectual and spiritual possessions are the fruits of effort; they are thoughts completed, objects accomplished and visions realized. The Vision that you glorify in your mind, the Ideal that you enthrone in your heart - this you will build your life by, this you will become. Cherish your visions; cherish your ideals; cherish the music that stirs in your heart, the beauty that forms in your mind, the loveliness that drapes your purest thought, for out of them will grow all delightful conditions, all heavenly environment of these, if you but remain true to them, your world will at last be built.’

And all of it is still very true I feel in the early stages of the information revolution, when Science and Philosophy are rediscovering both relations as well as Time, despite, or maybe in spite of, the troubles of the new economy and the highly unsettled and rather dangerously polarizing state of the international political scene. Maybe at this stage we should make a truly all-out effort for every human being not only to have a natural ‘mother tongue’ but also a ‘father tongue’ which should ensure that every human being can move around the world and be accepted and understood wherever he or she may go. Maybe it is indeed time to reverse the ‘Tower of Babel’ of currently some 6000 languages and establish a universally adopted cosmic language, based on the natural vibrations of all things, using the English language as its instrument of communication, a *lingua franca*. In addition to every person’s natural mother tongue this may well fill this requirement in a highly sensible way and moreover not difficult to learn and master.

ZERO

CONCLUDING STATEMENTS

the '21' that we all amount to in the cosmic sense

On the strength of the material presented in the foregoing 9 Chapters which seems to indicate that, as unlikely as it may seem, that 'The Ancients' some 3000 years ago had a pretty good idea about 'what plays out' in our World early on in the 21st Century. So, rather than attempting the usual conclusions and recommendations, six closing statements:

One: Since the title of this short treatise has the word practical in it, let me provide you with a practical example, despite it being History now, of how this could work for the benefit of all of humankind, especially in this still highly charged and uncertain hour for the world as a whole. Just using my 'considered fantasy' and metaphorically speaking as Reality at the time of writing these lines does not seem to be anywhere near such a situation because of the current way of thinking in this World:

'If the Government of the United States of America, with the unanimous support of the United Nations Security Council, could convince the Afghan Taliban to convince Osama Bin Laden to formally change, including all the nasty paperwork, his name into 'Osamal been Lauden' and leave him quietly in his mountain hideout, the problem would be solved without all hell breaking loose and more to come! 'Osamal' would overnight lose his highly destructive '16' vibration and become by his new first name a '19', the 'Prince of Heaven'. The name 'been', just like bin would still be a destiny number, the straight '8', but would gain the '17' vibration, called 'The Magic Star of Venus'. And 'Lauden' would be freed from the most difficult symbolism by changing his '18' into a '24' which stands for 'Love, Money and Creativity' i.e. love for and from his dear ones and money and creativity put to good use to benefit those around him. The vibration of his new full name 'Osamal been Lauden' would still be exactly the same as his current '6/33' vibration, called 'The Lucky Number', and lucky he has been so far with all these millions of US \$\$\$ on his head and still 'roaming freely' in his own Guantanamo until...clearly his luck ran out! Goes to show where the buck stops once in a while!

If at the same time, as a 'quid pro quo', George W. Bush would accept to be called henceforth 'George, Son of Bush, S.O.B. for short,' he would become an '8/26' like the previous UN Secretary-General Kofi Annan, a true partnership character and he would do himself a favour and start to finally vibrate with his function, that of 'President Bush', also an '8/26'. And, lo and behold, one can never tell, the world might well have seen the three happily playing with their marbles in the White House Rose garden before Christmas 2008. They may have a little squabble or two about who has the nicest marbles but then that is only human! And after all this was arranged for and officially on file, with exchange of the formal documentation of course, young Osamal would still be, cosmically speaking, the strongest character but an extremely agreeable chap for that matter! Alas, History, obviously for its own good and valid reasons, has let this golden opportunity pass unused and the rest is History by now indeed!!!

Two: From my wanderings in the philosophical, scientific, theological, cultural and futuristic literature I wish to quote the ultimate paragraph of a book by Nobel Prize recipient Ilya Prigogine and his colleague Isabelle Stengers, 'Order out of Chaos', the two of them in turn quoting a Talmudic text saying:

"Twenty-six attempts preceded the present Genesis, all of which were destined to fail. The world of man has arisen out of the chaotic heart of the preceding debris; he too is exposed to the risk of failure, and the return to nothing."

"Let's hope this works!" (Halway Sheyaamod in Hebrew and a '21' in our context!) exclaimed God as he created the World, and this hope, which has accompanied all the subsequent history of the world and humankind, has emphasized right from the outset that this history is branded with the mark of radical uncertainty."

Three: Moving full circle to the first line of this short treatise, it seems indeed high time for the World, including all living and material things of all races, religions and political dogma's, to come together as One. On the basis of the evidence presented above we could be 'Moving towards a Reality based Future', a '27'

by no chance in which ‘Oneness’, the ‘6/33’, will be the ‘Central Principle’, one of the ‘5/32’s’ referred to early on in Chapter Three. If we bear in mind, speaking of vibrations, that the expression ‘Resonance of Form’ contains both a ‘27’, The Sceptre, a ‘15’ ‘The Magician’ and a ‘21’ ‘The Universe’, jointly constituting again a ‘27’, the point seems to have been made. The first sentence of Chapter One of this short treatise ‘As all Life is One, the World should come together as One’ has the same cosmic vibration as both the word ‘Resonance’ as well as ‘Resonance of Form’, i.e. the ‘27’, ‘The Sceptre’. And moreover, this has the same vibration as the sentence ‘It is Time for this Nonsense to be called to a halt’!

Four: After a discussion with one of those beautifully enlightened souls on this planet in my neighbourhood, I decided to include the following statement from Herman Hesse in his ‘Siddhartha’ for all of those who read this to take heart, wisdom and courage from:

“The world.....is not imperfect, not slowly evolving along a long path to perfection. No, it is perfect at any moment; every sin already carries grace within it, all small children are potentially old men, all sucklings have death within them, all dying people - eternal life. It is not possible for one person to see how far another is on the way; the Buddha exists in the robber and dice player; the robber exists in the Brahmin....Therefore, it seems to me that everything is necessary, everything only needs my agreement, my assent, my loving understanding; then all is well with me and nothing can harm me. I learned through my body and soul that it was necessary for me to sin, that I needed lust, that I had to strive for property and experience nausea and the depths of despair in order to learn to love the world, and no longer compare it with some kind of desired imaginary world, some imaginary vision of perfection, but to leave it as it is, to love it and be glad to belong to it.”

Herman Hesse, 9/27 in
Siddhartha Gautama, 5/32

Five: Quoting Johann Wolfgang von Goethe, an 8/26 ‘Partnership’ vibration, I include an important contribution to this treatise at the time that it was needed, by clearly a Dealist at heart:

“Until one is committed, there is hesitancy, the chance to draw back, always ineffectiveness. Concerning all acts of initiative and creation there is one elementary truth, the ignorance of which kills countless ideas and splendid plans: that ‘the moment one definitely commits oneself, then Providence moves too’. All sorts of things occur to help one that would never otherwise have occurred. A whole stream of events from the decision, raising in one’s favour all manner of unforeseen incidents and meetings and material assistance, which no man could have dreamed of would have come his way. Whatever you can do, or dream you can, begin it. Boldness has genius, magic and power in it! Begin it now!”

Finally, based on all of the above, it seems to be abundantly clear that:

Six: For its own environmental wellbeing and socio-economic and cultural prosperity ‘The World should Deal with Energy differently, particularly Cosmic Energy’, a straight 3, like 2001 as well as **2010** and ‘**The Truth has never harmed any country, but concealing It certainly has**’, a straight **1**, which this treatise is all about.

I wish to conclude this short treatise with a more than appropriate quotation from the outstanding book by Prof. Em. Roland Omnès “Quantum Philosophy”; ‘Understanding and Interpreting Contemporary Science’, first published in 1999 at the turn of the Millennium.

“Once we are aware of this fact, together with the chasm, i.e. between Logos and Reality, we mentioned earlier and the arguments of the mathematicians regarding the absolute consistency and miraculous prolificness of their science (‘It’s too beautiful, it’s too beautiful, but it is necessary’), we are led to the conclusion that the existence of Logos is an entirely plausible hypothesis.

Thus, to the question concerning the nature of mathematics---is it part of Reality, does it exist through Reality, or does it have an independent existence? We shall answer: Part of Reality? No, because of the chasm, that irriducible hiatus that separates Reality’s skin from its garments; do they exist through Reality? No, because the barren poverty of the particles reduced to themselves would be unable to sustain any

symbols that might conceal the laws. Hence mathematics exists by itself, as the consistency and fecundity of the fragments already discovered by the human mind suggests.

Doesn't Spinoza say in his first Proposition of his 'Ethics': 'By substance I understand what is in itself and is conceived through itself'? We find it in it what it is, a Reality, and what conceives and conceives itself, a Logos, just as we find the same dichotomy in Nature, under its forms '*Natura naturata*' and '*Natura naturans*', i.e. receiving and giving shape. There is a lot to be learned and be had from Spinoza!"

When will Humankind both draw benefit from, both spiritually, culturally and materially, and consequently act upon the generous lessons offered by the immutable and consistent laws of Nature and as well realize and accept that its 'Existence and Being', that '**8/26**' destiny vibration called 'Partnerships', and all the consequences 'flowing' from it depend on that and just that Force? The very word 'Understanding' literally implies that One accepts to 'stand under a Higher Principle', i.e. that of 'Heaven', the '**9/27**', i.e. 'Logos and Reality' the '**5/32**', called 'Communication', same vibration as 'Love, Wisdom and Truth'! 'Only Time', the '**21**' can and will tell', altogether a '**32**' 'Communication' once more!!!
