These give
'different viewpoints'
of the same simple
mathematical truth.

For us to meet the objective of the UN Climate Treaty we have 5 8-year cycles for full-term C&C left. The next 'Transit of Venus' [where it visibly crosses the Sun] from the Earth is on the 6th of June 2012. In the real cycle of 8 Earth Years, there are 13 Venus years and 5 apogee [close encounter] moments, so 25 are left. The near perfect Pentagrammatic [Pythagorean] 'Flower Pattern' emerging here is the same regardless of view-point.
