

SUNCENTRICITY for the 21st Century

Negotiating UNFCCC-compliance isn't Earth-Centric but UNFCC&C or Solar-Centric

	\$-Earth Centric Like 'Geo-Centric' view, where the Sun goes round the Earth	UNFCC&C-Sun-Centric Like 'Solar-Centric' view, where the Earth goes round the Sun
Intellectual Heritage	Appearance Deceptive - Error Ideological-Ptolemaic-Vatican.	Appearance Corrected - Reality Logical-Post-Copernican-Galilean.
Long Range Vision	Unsustainable Anti-Development We are what destiny decrees.	Sustainable Development We must shape our Common Destiny.
Current Political Modus Operandi	Error Presented; UK-centric, C&C 'rates prescription'.	Error Corrected; UNFCC&C-centric negotiating process.
Quantum Numeraire [Unit of Measurement]	Money per unit something, per unit infinity [the never-never].	Carbon per person, per unit-time, subject to UNFCCC objective [C&C].
Effect of using this Numeraire	Chaotic; '3-body problem'; UNFCCC-compliance impossible.	Centre of gravity; '3-body solution'; UNFCCC-compliance possible.
Policy [Unit of Management]	Fiscal, marginal taxes, maybe with carpetbag-and-trade.	Global commons entitlements, with structural cap-and-trade.
Results of using this Policy	Rhetorical, random, non-teleological, recession, depression, catastrophe.	Rational, non-random, teleological, risks-managed, steady, containable.
Organisational Model	Vulture-Capitalism; Market-Based-Framework.	Framework-Based Market; Venture-Per-Capitalism with limits.
Effect of using this Model	Expansion and Divergence, dither-and-drift, boom-and-bust.	Contraction and Convergence, stringularity, goal-focus, steady-state.
Game-Theoretical Result	Each is always randomly caught in everyone else's games.	All become founder members of the same constitutional game.

UNFCCC-Compliance= $C\&C*5^2$ (EVPK)

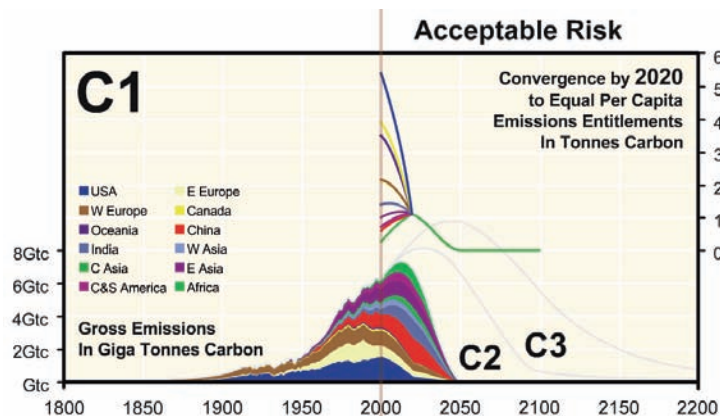

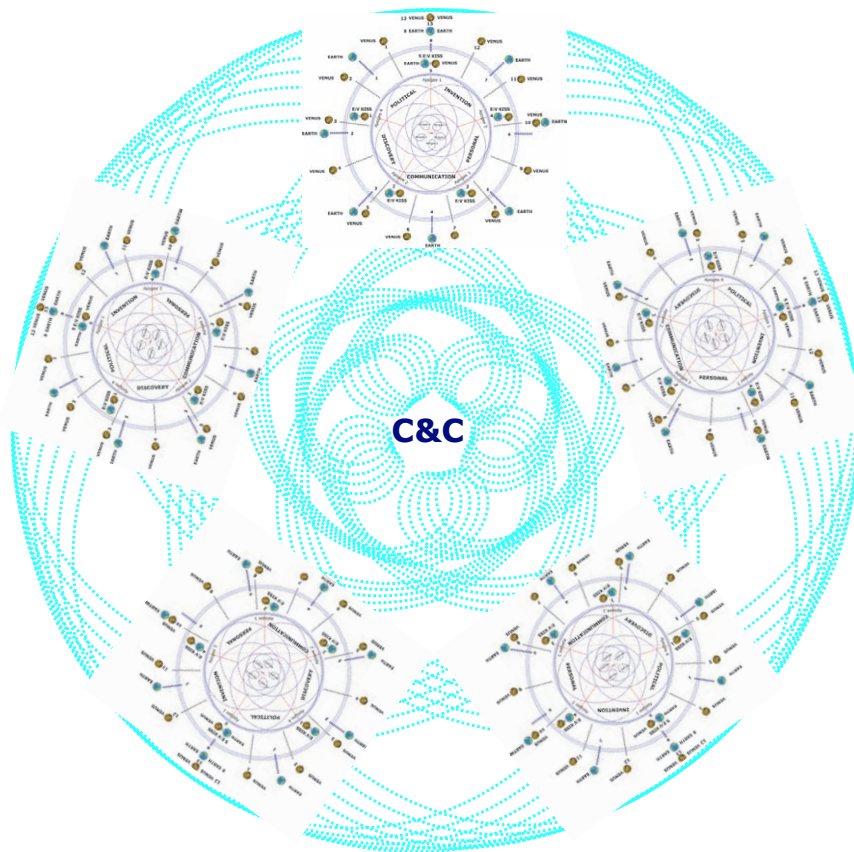

C&C-Centric 'path-dependency'.

In 13 Venus years, there are 8 Earth years,
and 5 Earth:Venus Perigee 'KISS' (EVPK) moments*.

This suggests a 'wave-particle' synthesis of how
a C&C-centered consciousness co-operates as
a 'concept-constitution' or 'centre-of-gravity' that
'pulls-together' from the centre of 'expanding-consciousness'.

**Note, 5 of these cycles in sequence totals
the 40 odd Earth years still available [2010-50]
to complete the full-term C&C-event that achieves
UNFCCC-compliance i.e. $UNFCCC-compliance = C\&C*5^2$ (EVPK).**

So, where in this path-integral, is it appropriate to
'place-and-vector' various 'sector-specific-constituencies'
when success is governed by completion of the full-term
C&C-event that achieves UNFCCC-compliance?

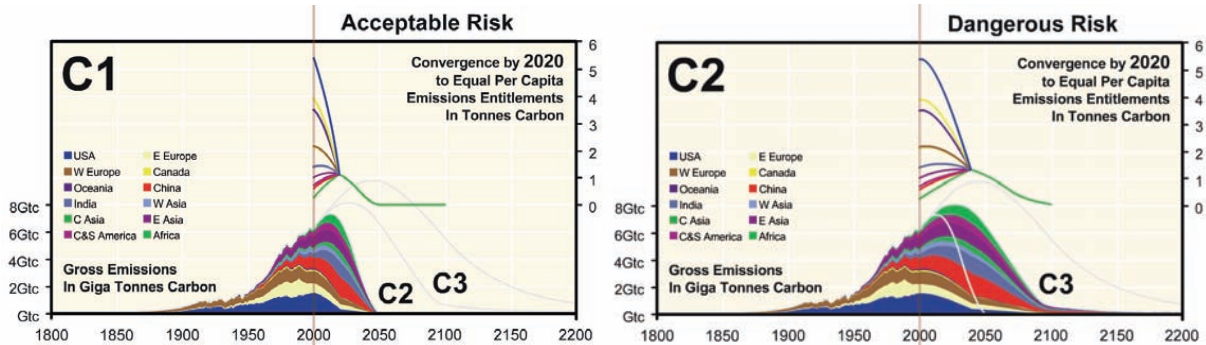

The sure way not to fail is the determination to succeed.

In the solar-system, the cycle for this has already been determined.
The key is linking that to the question, 'are we determined to succeed'?

If we are . . . then the need to link this path-integral understanding,
in the disaggregated and often harshly competing special interests of
'sector-specific-constituencies', to that commitment follows and is absolute.

Currently Governments negotiate C&C around rates shown in C2, when rates in
C1 would reduce the risk; but at least its C&C and its no longer at rates C3: -
