

# SUNCENTRICITY for the 21st Century

## Negotiating UNFCCC-compliance isn't Earth-Centric but UNFCCC&C or Solar-Centric

	<b>\$-Earth Centric Like 'Geo-Centric' view, where the Sun goes round the Earth</b>	<b>UNFCCC&amp;C-Sun-Centric Like 'Solar-Centric' view, where the Earth goes round the Sun</b>
<b>Intellectual Heritage</b>	Appearance Deceptive - Error Ideological-Ptolemaic-Vatican.	Appearance Corrected - Reality Logical-Post-Copernican-Galilean.
<b>Long Range Vision</b>	Unsustainable Anti-Development We are what destiny decrees.	Sustainable Development We must shape our Common Destiny.
<b>Current Political Modus Operandi</b>	Error Presented; UK-centric, C&C 'rates prescription'.	Error Corrected; UNFCCC&C-centric negotiating process.
<b>Quantum Numeraire [Unit of Measurement]</b>	Money per unit something, per unit infinity [the never-never].	Carbon per person, per unit-time, subject to UNFCCC objective [C&C].
<b>Effect of using this Numeraire</b>	Chaotic; '3-body problem'; UNFCCC-compliance impossible.	Centre of gravity; '3-body solution'; UNFCCC-compliance possible.
<b>Policy [Unit of Management]</b>	Fiscal, marginal taxes, maybe with carpetbag-and-trade.	Global commons entitlements, with structural cap-and-trade.
<b>Results of using this Policy</b>	Rhetorical, random, non-teleological, recession, depression, catastrophe.	Rational, non-random, teleological, risks-managed, steady, containable.
<b>Organisational Model</b>	Vulture-Capitalism; Market-Based-Framework.	Framework-Based Market; Venture-Per-Capitalism with limits.
<b>Effect of using this Model</b>	Expansion and Divergence, dither-and-drift, boom-and-bust.	Contraction and Convergence, stringularity, goal-focus, steady-state.
<b>Game-Theoretical Result</b>	Each is always randomly caught in everyone else's games.	All become founder members of the same constitutional game.

# UNFCCC-Compliance = C&C \* 5<sup>2</sup> (EVPK)

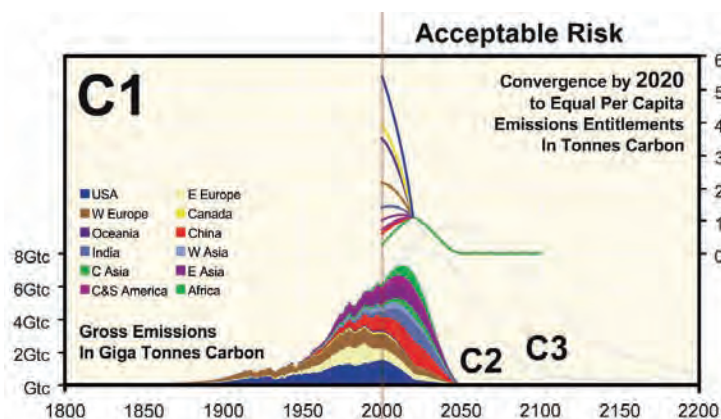

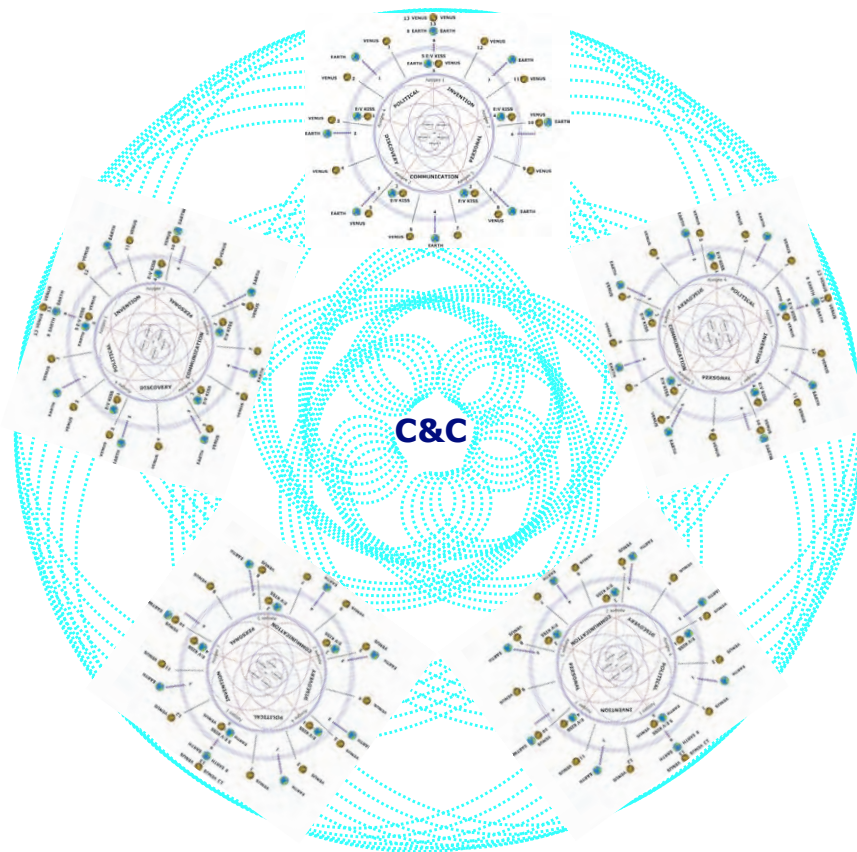

C&C-Centric 'path-dependency'.

In 13 Venus years, there are 8 Earth years, and 5 Earth:Venus Perigee 'KISS' (EVPK) moments\*.

This suggests a 'wave-particle' synthesis of how a C&C-centered consciousness co-operates as a 'concept-constitution' or 'centre-of-gravity' that 'pulls-together' from the centre of 'expanding-consciousness'.

**Note, 5 of these cycles in sequence totals the 40 odd Earth years still available [2010-50] to complete the full-term C&C-event that achieves UNFCCC-compliance i.e. UNFCCC-compliance = C&C \* 5<sup>2</sup> (EVPK).**

So, where in this path-integral, is it appropriate to 'place-and-vector' various 'sector-specific-constituencies' when success is governed by completion of the full-term C&C-event that achieves UNFCCC-compliance?

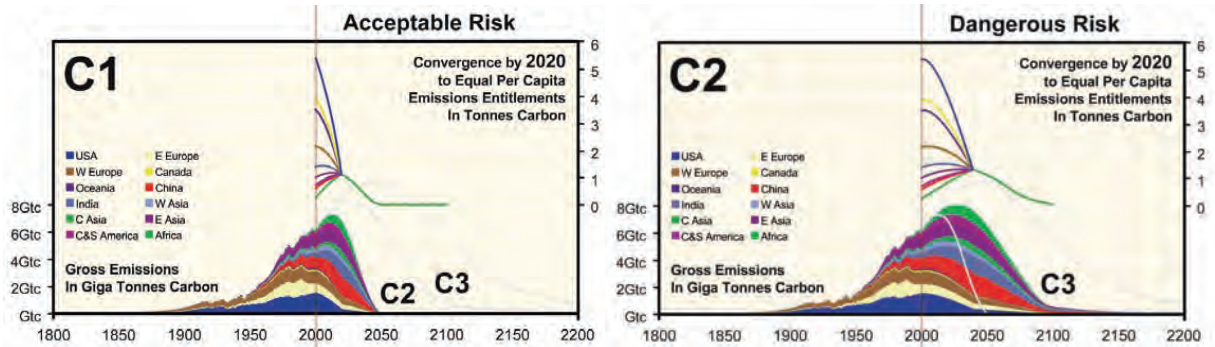

The sure way not to fail is the determination to succeed.

In the solar-system, the cycle for this has already been determined. The key is linking that to the question, 'are we determined to succeed'?

If we are . . . . then the need to link this path-integral understanding, in the disaggregated and often harshly competing special interests of 'sector-specific-constituencies', to that commitment follows and is absolute.

Currently Governments negotiate C&C around rates shown in C2, when rates in C1 would reduce the risk; but at least its C&C and its no longer at rates C3: - [http://www.gci.org.uk/animations/C1\\_C2\\_C3\\_animation.exe](http://www.gci.org.uk/animations/C1_C2_C3_animation.exe)

Below is the enlarged detail of the image on the previous page.
