

THERE'S NO EQUITY in NO SURVIVAL

INDCs to 2010 - 2030 use whole IPCC 250 Gt Carbon Budget for 2° Celsius (66%).
CHINA & INDIA alone project a 200 Gt Carbon, or 80% use of that Budget.
INDCs 2031 - 2100 more than double that to 490 Gt C for +4° Celsius.

For sensible & still possible rates for framing the solution, go here: - <http://www.gci.org.uk/images/Easing-Squeezing.png>
