

**UKMO has cloned its implausible CLIMATE-MODELLING into the IPCC AR5.**  
**UKMO agree these RESULTS for the RCP 2.6 Emissions Control Scenario come**  
**from using a CLIMATE-MODEL that *OMITS MODELLING MAJOR FEEDBACK EFFECTS*,**  
**such as the increased Atmospheric Water Vapour & CO<sub>2</sub> & CH<sub>4</sub> from PERMAFROST MELT**  
**& the LOSS of Positive ALBEDO & the increase of Negative ALBEDO from ARCTIC ICE MELT.**
